with attitude

**Public Lectures
National Science
Week 2004**

Fred Watson

**Astronomer-in-Charge
Anglo-Australian Observatory**

The night sky has had a profound influence on human thought across all the cultures of the world. It has inspired a rich and varied folklore that attempts to sum up human attitudes to the sky and life on Earth. Even more inspiring is the picture of the awesome Universe that modern science provides. What should our attitude to that be?

Join Fred Watson of the Anglo-Australian Observatory as he explores these topics with stunning celestial images and inside information on our growing understanding of the complexities of the Cosmos.
